ABOUT ME

I graduated with a degree in Computer Science, specializing in Web Applications, from the Polish-Japanese Academy of Information Technology in Gdańsk.

I am interested in programming and modern technologies, with a strong focus on frontend development, which was my specialization during my studies and an area where I can combine creativity with technical skills.

I am seeking opportunities to grow as a Junior Frontend Developer, while remaining open to learning other technologies and programming languages. I am highly motivated to continuously develop my skills, eager to take on new challenges, and comfortable working in a team-oriented IT environment.

PROJECTS

My CV

A web application showcasing my skills. Built using React, Vite, Tailwind CSS, and React Router for dynamic and responsive performance

<https://my-cv-orcin-xi.vercel.app/>

Interactive Credit Card Form

An interactive credit card data form created with HTML, CSS, and JavaScript, featuring dynamic validation and live data preview.

<https://interactive-card-form-gilt.vercel.app/>

Memory Game

A simple memory game built with HTML, CSS, and JavaScript using jQuery, allowing card matching and round counting.
